As you can see, you can run up to three different laying strategies with LayPro88 Bot. You can select separate strategy you want to bet for each lay.

For example : *Lay 1 – you can bet only on first fav, Lay 2 – you can only bet on 2<sup>nd</sup> fav and so on.*

Please remember we are only betting on Correct Score Market for the any football match which is on Betfair.

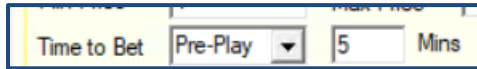

**Selection:** - You can select the any favorite you want to bet on among the first 12 favorites or select any scoreline

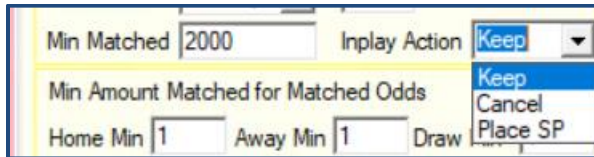

**Min price and Max price** is the price range which user can select for the selected favorite or any scoreline to be qualified for betting

**Time to bet:**

Time to Bet: Pre-Play (dropdown), 5 Mins (input)

Say, Select Pre-Play and 5 minutes in **Time to bet** settings. So, all matches to be checked for qualification starting 5 minutes before the official start of the match.

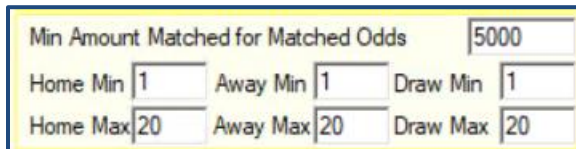

Min Matched: 2000 (input)  
Inplay Action: Keep (dropdown menu open with options: Keep, Cancel, Place SP)  
Home Min: 1 (input), Away Min: 1 (input), Draw: (input)

**Minimum amount matched** : Amount of minimum money should be matched in the correct score market for bot to make a qualified selection. ***In order to avoid low liquidity matches, atleast keep \$2000 or more as per your equalivant currency.***

**In Play Action:** Always keep as the select so, bets should get matched if they are not during in Play ( if in play betting is allowed)

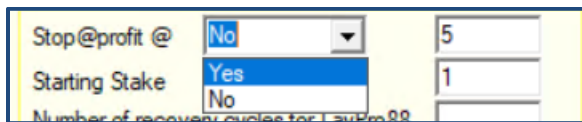

**Min amount matched for Matched odds :**

Min Amount Matched for Matched Odds: 5000 (input)  
Home Min: 1 (input), Away Min: 1 (input), Draw Min: 1 (input)  
Home Max: 20 (input), Away Max: 20 (input), Draw Max: 20 (input)

Above box is all linked to Match odds market : Amount of minimum money should be matched in the **Matched odds market** for bot to make a qualified selection. ***In order to avoid low liquidity matches, atleast keep \$5000 or more as per your equalivant currency.***

And then you can filter the home, away and draw odds for the football match ( 1X2 market). This is very helpful to avoid certain matches if you are good in reading soccer games.

Stop@profit @: No (dropdown), 5 (input)  
Starting Stake: Yes (dropdown), 1 (input)  
Number of recover cycles for Losses: (input)

**Stop@profit @ - Yes or No:** Input the profit value you want and select Yes/No if you want bot to continue once profit is reached.

Stop@profit @	No	5
Starting Stake		1
Number of recovery cycles for LayPro88		5
Maximum Back-Lay tick difference		5

**Starting Stake:** Input the stake you want to place the first bet.

**Number of recovery cycles:** Hope you have understood the laypro88 staking as explained in the manual, please input the recovery cycle # here.

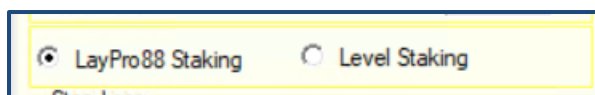

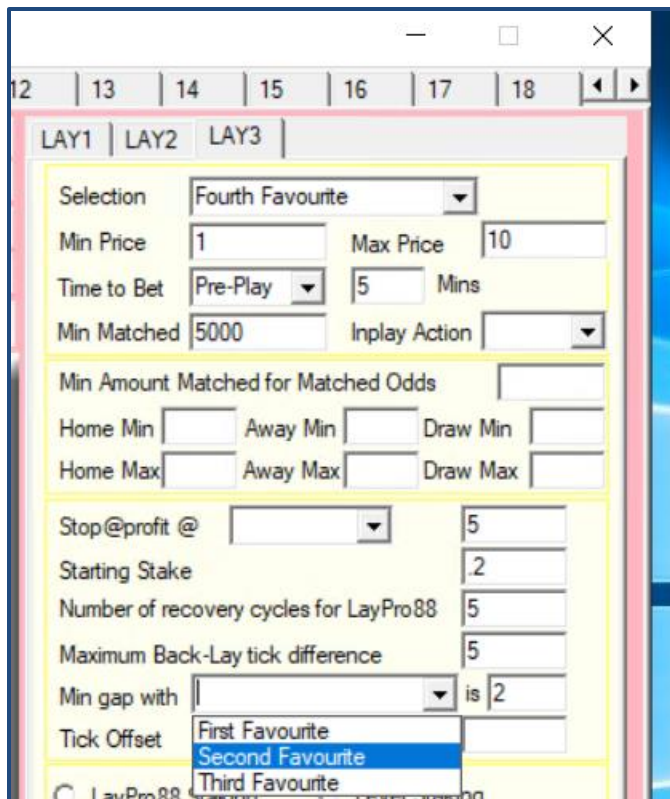

**Maximum Back – Lay Tick difference:** Just want to avoid games with poor liquidity where the market is not yet formed. Difference between Lay odds and back odds should not be more than 5 for that score line. (value of 5 is recommended to start with)

Min gap with	First Favourite	is	1.5
Tick Offset	First Favourite		2

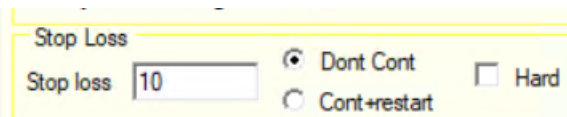

Select the minimum gap between your selection and any other favorite and input the value. Say, if you have selected 3<sup>rd</sup> favorite which you want to bet on (as per Laypro88), then in the dropdown, you will get option to select first favorite or 2<sup>nd</sup> favorite to select.

LAY1   LAY2   LAY3

	Second Favourite

If you want to bet on 4<sup>th</sup> favorite, then you will get option to select 1<sup>st</sup>, 2<sup>nd</sup> or 3<sup>rd</sup> favorite. It is not required as per Laypro88 system but we have given user more options to use with the bot.

Select Laypro88 staking if you want to use Laypro88 (recommended) or use Level staking.

**Stop @Loss for each tab** – is the value once passed then the tab will either stop betting or restart the sequence of betting.

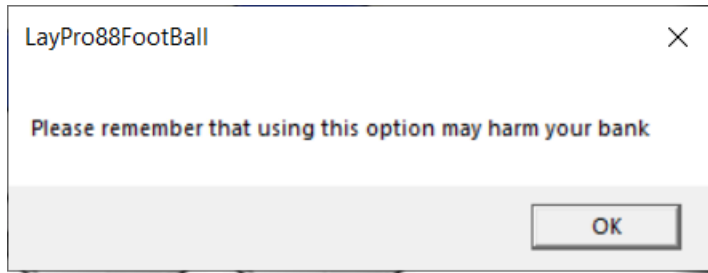

Please keep in mind, bot will pass the stop loss figure , as it will place a bet, if the loss is below the stop loss , so remember, a 10 stop loss could actually be much higher. Once the stop loss has been passed, it will either stop or restart ( if option is ticked)

**Example: If stop loss is set at 50, and the tab has a loss of say 48.00, the bot will still try and recover that 48 as it is under 50, so if the odds are say 2.0, then it will bet around 50 to recover the 48 loss plus the target. Meaning you will be at 98 should the bet lose. That is when the tab would stop trying to recover the loss.**

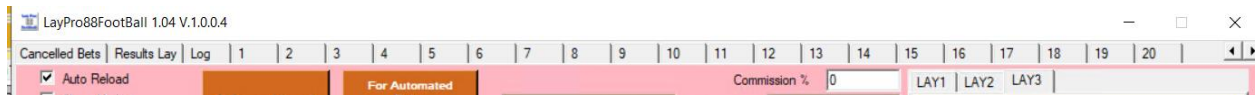

**But if you have Hard ticked ,then the bot will not place the above bet as expected loss can be 98 ( which is more than 50). Hard means hard stop loss, in no way, the stop loss can exceed value of 50.**

Here you can see two buttons – Continue with restart and Don't cont

Once the stop loss has been hit for any tab, then you would have option on not to continue betting or start a new cycle.

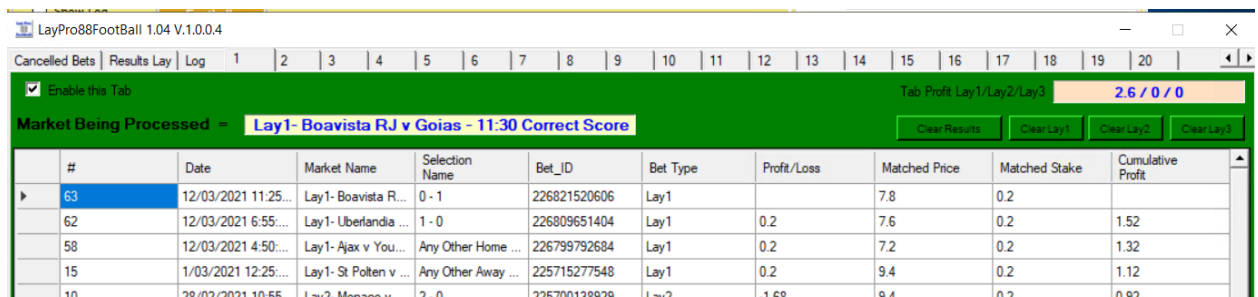

Please remember when you select continue with restart button; you will get above pop up which needs to be clicked OK. This is mandatory betfair requirement.

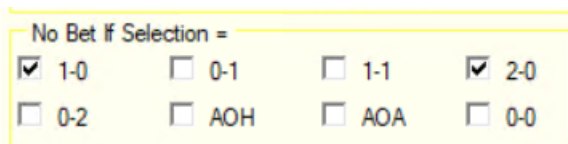

In Laypro88Football, you have 10 or 5 tabs which are ready to take bets if they are enabled.

Please use the number of tabs as advised in the settings.

Above is the view of one of the tabs, I will discuss details in tab view later.

**No Bet if selection:** - you can select the score lines which you don't want to bet on. In example above, you can see 1-0, 2-0 are ticked, it means – match will be ignored if 1-0 and 2-0 - either of them are final selections

**Mexican wave:** - This is very important that it is NOT ticked. This instruction makes sure that the betting is allocated to each enabled tab, and then starts again. If unticked it will bet first available tab and not rotate with all available tabs.

**Start button:** - Once the settings are set by the user, press the start button in order to start the bot.

**Stop button:** - press the stop button to stop the bot.

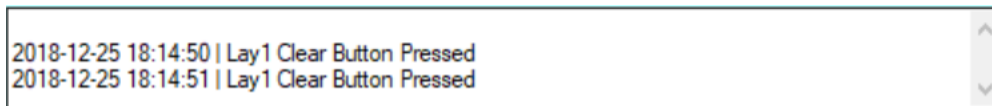

**Log out:** - press the log out button and you will come out of the bot.

### Clear button

when you start betting next day, the bot will start from the same cycle where you left it previous day unless you use a clear button and want to start fresh. If you want to continue the same cycle, don't use the clear button and just press the start button and let it run every day. There are respective clear buttons for each tab as well.

#	Date	Market Name	Selection Name	Bet_ID	Bet Type	Profit/Loss	Matched Price	Matched Stake	Cumulative Profit
*									

There is one box which you will see at the middle center of the interface.

It will show at what time the user pressed the clear button for the particular tab. The profit/loss for tabs will be shown accordingly from the time the clear button was last clicked.

As soon as you press the clear button, the bot will erase all staking sequence , profit/loss etc and will start fresh.

**Please keep auto reload checked all the time.**

**What to deselect Leagues or Matches?**

Lay 1- L will also all leagues, If you don't want to place a bet on any league, simply de-select it or if you want to avoid any match, simply de-select that match. Same you can do for Lay 2 - Leagues and Lay 3- Leagues as well.

In case, if you don't want to bet on any league, you can simply de-select that league.

This deselected league(s) will continue to be present in the league list in unchecked state till the time bot is open. So, all the future matches for these de-selected leagues continue to be ignored. So, in this case, you can ignore all the poor liquidity leagues.

Important note: The moment you start the bot again, all the de-selected leagues will come back , so you to have de-select them again.

It is recommended to re-start your bot once in 2 weeks. You can do that on Monday when the soccer action is least.

**In results tab**, you can see all consolidated results for each tab. Cumulative profit is shown at the top

Enable this Tab

Very important to keep the tabs enabled, otherwise bot will not take any bet in that tab, if it is not enabled.

**Log tab:** - it will give you view of what the bot is doing second by second.

This is very important feature in all of our bots. Now, the user can see what the bot is doing second by second. You may not be able to understand everything what is in the log but it is helpful in order to investigate any error.

You can access the detailed log file at the following address:-

**C:\Program Files (x86)\Profit Sports Betting\LayPro88FootBall\log\_files**

Welcome to Lay Pro 88 Football.

First of all, yes you guessed it right, - Laypro88football is based on almost same principle as Laypro88 for Horses which was originally launched to public in year 2007. Now, after 15 years, we are introducing to public the very profitable method for Football or Soccer Market as well.

Lay part of the name is obvious as it is a system to Lay (bet horses to lose). The Pro part of the name is from the developer of the system, as Anthony is a Professional punter that used to lays horses to make his living for many years.

Originally, the 88 part of the name is from the strike rate of winning bets (losing horses) which as you may have guessed is 88%. So that means 12% of the horses layed actually win and are losses for us.

And during the manual, we will cover the % of strike rate we have observed in football markets using this method.

You need to stick to the plan, don't start adapting it. It works fine the way it is.

Now once you see the system, it may look over simple. Don't let that worry you. This is as I said earlier is a working method.

What you require is:

1. A Betfair account.
2. Internet connection
3. And the LayPro88 Football Bot

And that is all required. yes, if you have [laypro88football](#) betfair bot, life is super easy 😊

Here are the rules and then I will explain the reasons for them.

### **- The Lay Pro 88 Football Rules -**

#### **We have 3 strategies for Laypro88Football**

Strategy 1 (Lay the first favourite)

1. Works on all Worldwide matches
2. First favourite ( Scoreline ) has to be between 7.0 and 10.0 on betfair around 1 min before the kick off.
3. In match odds market, home team odds has to be between 1.3 to 1.8. Away odds and draw odds should be less than 10.0 each
4. In match odds market, home team odds has to be between 1.3 to 1.8. Away odds and draw odds should be less than 20.0 each
5. Don't bet on match if the fav scoreline is 1-1
6. If you are using the Laypro88football for betfair, then please make sure you have at least 5000 AUD matched in matched odds market and 2000 AUD matched in correct score market.

Settings for Laypro88football clients

These settings are based on 1.00 (euro,Pound,dollar), remember bot is placing average 10-20 bets in a day in strategy 1, hence we don't advise high stakes when you start the bot.

## Lay 2

.20 is the stake

### Strategy 3 (Lay the 3<sup>rd</sup> favourite) with a twist

1. Works on all Worldwide matches
2. Third favourite ( Scoreline ) has to be between 7.0 and 12.0 on betfair around 1 min before the off.
3. In match odds market, home team odds has to be between 1.0 to 2.0. Away odds and draw odds should be less than 10.0 each
4. If you are using the Laypro88football for betfair, then please make sure you have at least 5000 AUD matched in matched odds market and 2000 AUD matched in correct score market.

These settings are based on 1.0 (pound,dollar, Euro), remember bot is placing average 5-10 bets in a day in strategy 3, hence we don't advise high stakes when you start the bot.

## Lay 3

**1.00 unit stake**

### Why 1 minute or less before the start?

In the last couple of hours before the start of the match, lot of money comes in and hence we recommend to wait till last 1 minute and lay accordingly. If we bet too early, chances are first or 3<sup>rd</sup> favourite may change.

### What is a clear 3<sup>rd</sup> favourite?

To LayPro88 System, one clear 3<sup>rd</sup> favourite is one horse that near the start has the 3<sup>rd</sup> small odds, is inside the range (7.0 to 12.0 and at least 2.5 difference to the 1<sup>st</sup> favourite (example: 1<sup>st</sup> favourite @ 7.5 and 3<sup>rd</sup> favourite @ 10.0 or greater)

### Lay Pro 88 Staking Plan

**Here is how the staking plan works. (Concept is same as Laypro88 Horses)**

What works is all that counts.. This WORKS!

The principle is to recover losses without too much risk.

There are lots of staking plans that work fast to maximize profits but all of them will drain your bank in a bad run.

This plan will add one unit after one loss. If you are betting 10 units, then the next bet (only after a losing bet) so instead of betting 10 it would be 20 units. After one win we will stay with the same stake if the last was like the first or will decrease 1/5 (Stake) if the last was bigger then the Start stake.

Check the last picture:

In the Gold column you can follow the system with our Staking Plan and in the Pink column you can follow the system with flat bet. We have a run with 20 bets (3 losses and 17 winners). As you can see it's below 88% but we still doing a nice profit.

The first stake was 10 and we won. The second stake stills 10 and we won again. We lost the 3<sup>rd</sup> bet so, in the 4<sup>th</sup> bet we will stake 20 (10+10). We won so we will decrease the last stake (20) in 1/5 of the start stake (10). See the calculation:  $(1/5 * 10 = 0.2 * 10 = 2)$ . Next stake will be  $20 - 2 = 18$  (Bet # 5). And we will continue decrease 2 until the next lost (Bet # 7). After one lost we will increase the stake by 1 unit (10 in this case). Next Stake will be 14 (the last one) plus 10 (the start stake). Calculations ( $14 + 10 = 24$ ) and this is our Stake for Bet # 8. Then, as you can see we had a nice run with 9 wins in row. We will stop decreasing the last stake when reach our usual stake (10 in this example).

As you can see this plan will help you to Profit +86.70 instead the +7.50 with Flat Stake.

If you want to use this plan it's necessary that you have a bank with 100 times the 1st stake to be comfortable. Let's say 1000 to Lay 10

If you are our existing user of Laypro88/SAW Deluxe /APS Deluxe, then I am sure you will find Laypro88Football bot very comfortable to use. But if you are new to our bots, I strongly recommend you to go through and read APS manual or SAW Deluxe and the user vidoes, so you get end to end view on functioning of our bots.
